

FIG. 1 is a block diagram of a network system 100. The system 100 includes a TMN Agent Hardware 150, a TMN Agent Software 160, and a TMN Manager Software 170. The TMN Agent Hardware 150 is connected to the TMN Agent Software 160, which is in turn connected to the TMN Manager Software 170. The TMN Agent Hardware 150 includes a Network 108a, which is connected to various devices including Phone(s) 151, Fax(es) 152, Router(s) 153, Switch(es) 154, and Tower(s) 156. The TMN Agent Software 160 includes Server(s) 161a, 161b, and 161n. The TMN Manager Software 170 includes Client(s) 171a, 171b, and 171n. The Network 108a is also connected to a Satellite Dish(es) 155. The Network 108b is connected to the TMN Manager Software 170.
